

EXXETA AG selects MECOMS™ to optimize the Customer Management and Billing processes at Energy and Utilities in Germany

The German utility market is facing a historical change; new participants are entering the market and existing business models come under scrutiny. Supply and demand are becoming increasingly volatile, regulatory requirements are becoming increasingly complex. Digitization and new IT-based business models grow into the role of being an enabler for creating added value.

Addressing these new needs, EXXETA and Ferranti will combine forces to provide the MECOMS™ Solution.

**EXXETA** brings business and IT together and helps transform business requirements into IT solutions. In the area of the utility market, EXXETA combines industry-specific expertise with profound knowledge of Microsoft technologies such as Dynamics AX, Dynamics CRM and SharePoint. The focus is on helping companies increase their efficiency, become even more successful, limit risks and promote innovation.

EXXETA's comprehensive portfolio offers Management Consulting, Methodology Consulting, IT Consulting and Industry Consulting specialized in Energy, Automotive, Financial Services and Transport & Logistics.

EXXETA AG has its headquarters in the Karlsruhe Technology Park. It employs over 300 staff at five locations in Germany and a subsidiary in Switzerland.

**MECOMS™** is a configurable Meter Data Management (MDM) and Customer Information System (CIS) that enables energy- and utility providers to improve and automate their business processes with ease and efficiency, and is built on proven Microsoft technology.

MECOMS™ is developed by **Ferranti Computer Systems NV**, a specialist supplier of solutions to the utilities sector with MECOMS offering a first class Billing and Customer Management solution with nearly 40 years' experience and 40 companies in 15 countries running MECOMS™ to power their utility business.

Ferranti provide utility companies with MECOMS™ a solution to their billing and CIS needs that will:

- Be flexible to their changing needs
- Be intuitive and simple to use
- Maximizes efficiency and standardization when implementing their business processes.
- Lowers the cost to serve

New product developments will be positioned at E-world 2016 in Essen at the Microsoft booth.
