

Ferranti improves its position in Gartner's Utilities CIS report for its MECOMS™ product

We are proud with the positioning of Ferranti Computer Systems for our MECOMS™ product in Gartner's "Magic Quadrant for Utilities Customer Information Systems". The report was published on June 2nd, 2015 by Gartner research.

We are extremely pleased because the Gartner Magic Quadrant concept is based on a customer-oriented market analysis. Gartner talk to real customers and evaluates vendors around the world to make their assessment.

We believe Ferranti Computer Systems has met again the strict evaluation criteria imposed on the competing vendors, and clearly strengthened its position in the market.

"We believe that the continuing placement of Ferranti in the "Magic Quadrant" is a proof-point of our growing presence in the energy sector", says Tom Van Haute, Chief Technology Officer at Ferranti Computer Systems.

Gartner's report entitled "Magic Quadrant for Utilities Customer Information Systems" was published on 2 June 2015, by Zarko Sumic
